

Environmental Policy

Commitment to Environmental Integrity

Logical Biological is committed to environmental stewardship, recognising our critical responsibility to conserve and enhance the environment. A core aim is to significantly reduce the environmental impacts and potential risks associated with our operations, ensuring a sustainable future for all.

Key Objectives

To fulfil our environmental commitment, we are dedicated to the following strategic objectives:

- | **Environmental Best Practices:** We will integrate robust environmental management policies across our entire operation.
- | **Legislative Compliance:** Upholding and exceeding the standards set by relevant environmental legislation is not just our obligation but our minimum standard.
- | **Resource Efficiency:** We are committed to the efficient/ minimal use of energy and water.
- | **Responsible Procurement:** Promote environmentally responsible procurement of goods and services. This policy is communicated to our suppliers.
- | **Waste Minimization:** We strive to reduce waste generation, advocating for practices that prioritize reuse and recycling, including water, and ensuring the safe treatment and disposal of residual wastes.
- | **Pollution Prevention:** Our operations are reviewed and refined to minimise, prevent, and where possible, eliminate pollution.
- | **Carbon Footprint:** We aim to lessen the environmental impacts of transport associated with our operations, including business travel, staff commuting, dry ice and electrical usage and freight. We will monitor and assess alternatives options to reduce our carbon footprint. We will offset our carbon footprint that is unavoidable due to business-critical activities.
- | **Asset Decommissioning:** We are dedicated to minimizing the environmental impacts associated with the decommissioning and disposal of our assets.
- | **Environmental Awareness Among Staff:** Educating our staff about our environmental impacts, activities, and performance, fostering a culture of individual responsibility and collective environmental stewardship, is a core company value.

Implementation and Responsibility

The Senior Management Team holds the primary responsibility for the effective implementation of this policy, ensuring that our environmental objectives are integrated into our strategic and operational decisions.

However, the successful realisation of our environmental aspirations requires the active participation of all employees. Staff at every level are encouraged to embody our environmental commitments in their daily activities and decisions, adhering to the protocols established under this policy.

Dr James Steggles

Managing Director
Logical Biological
